(54) Title: ADHESIVE BACKED SKINS AND GRIPS FOR HANDHELD DEVICES

(57) Abstract: A skin (11) for use with a handheld electronic device is disclosed. The skin (11) includes a decorative layer, an anti-slip layer adhered over the decorative layer, and an adhesive layer disposed between the decorative layer and the anti-slip layer. The anti-slip layer has a surface finish (19) having a high coefficient of friction. The skin (11) is attached to the handheld electronic device by a layer of adhesive (16) on the back of the decorative layer. The skin (11) is selectively shapped to conform to the contours, shape, and components of the handheld electronic device. The skin (11) provides anti-slip and shock absorption fucntionalities to the handheld electronic device, but does not prevent or impede the handheld electronic device from mating with or connecting to corresponding accessory components.
